

TerraLogos Energy Saving Products

TerraLogos makes it easy for you to find the best energy and money saving products and purchase them at great prices. We have partnered with Energy Federation Inc. (EFI), one of the leading residential distributors of energy efficiency-related products in the United States. EFI has a full complement of energy and conservation products that can be purchased through their [on-line catalog](#).

To make it even easier to get on the path to saving energy, water, and money, TerraLogos has searched the EFI Catalog and tested a variety of items which would be most needed by our customers. We have selected a short list of the best items to reduce your need for additional searching. Our selected products include:

- Compact fluorescent light bulbs in a variety of styles and wattage
- Low-flow shower heads (that really work)
- Thermal insulation for water pipes
- Programmable thermostats

and others that we believe will help our customers save money and natural resources. On the following pages, simply click on the name of the product, and you will go directly to that item in the EFI catalog.

Use the TerraLogos 10% Discount

As a TerraLogos customer you can buy online from [EFI](#) and save 10% off their already low prices. To get your discount,

1. Go to [EFI's on-line catalog here](#) and make your selections, adding them to your shopping cart. Use the item numbers and descriptions below to find some of the best selections.
2. After you have filled your shopping cart and started the checkout process, you will come to a screen labeled "Payment Information" where you will enter your credit card information.
3. In the middle of this page in the "Coupons & Promotions" section, simply enter the password "terralogos" in the "Code" box and click on the "Redeem" button to receive your 10% discount.

Recommended Products

Here are some quick and easy ways to save energy dollars. We have personally tested these items and recommend them for their convenience, performance, quality, and prices.

Light Bulbs:

Feit G25 Globe - 11w

These elegant round globes offer flicker-free start-up, and are suitable for use in bathroom vanity lights, swag lamps, pendant lamps, and similar types of indoor applications. They come in several sizes.

Price: \$5.50

Savings: 53 kWh

MaxLite MicroMax Spiral - 23w

The MaxLite MicroMax Spiral can fit in almost any fixture around the house. This CFL will replace 75 to 100 watt incandescent bulbs while only using a fraction of the electricity making this 23 watt CFL is a great energy saver!

Price: \$3.25

Savings: 141 kWh

Shower Heads:

AM 2.2 gpm Dual Spray Flow Control Aerator

This low-flow kitchen dual spray swivel aerator lets you direct the water flow where it's needed. Pull down on the aerator head for wide full-force spray, or slide it up for a splash-free aerated stream. A flip lever quickly reduces the full flow to a trickle to save more water.

Price: \$2.75

Niagra Chrome Earth Showerhead

The 2.0 gpm adjustable showerhead delivers a broad, soft, rain-like spray or a strong focused, pulsating massage. It is self-cleaning, and non-aerated spray for less temperature loss between the showerhead and you. Brass and plastic with a chrome finish.

Price: \$5.25

More TerraLogos Favorites:

Jebb Indoor AC Covers

If your Window Air Conditioner cools the room in winter, you are losing money. Tighten-up with these AC fitted blankets. Each pack contains a beige washable poly/cotton fabric with wind-block insulation, and a roll of removable tape. Check your size, they come in small, medium, and large.

Price: \$14.95

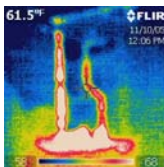

Anderson Pulley Seals

When well-maintained, older style double-hung windows can be relatively air-tight. But they often leak at the two lift-rope pulley pockets at the jamb tops. Feel the draft they make in the winter. Pulley seals are designed to fit snugly over pulley weight holes of older double-hung windows, eliminating drafts. Comes with adhesive gasket & screws. Easy to install. Do all your windows to obtain the best results.

Price: 5 pair, \$8.95

Maclanburg-Duncan Tube Pipe Insulation

To help conserve the heated water, insulate all accessible hot water pipes, PLUS the first 6 feet of cold pipes above the water heater with insulated pipe sleeves. This will reduce energy losses and increase the temperature of the hot water at your taps. Most systems use $\frac{3}{4}$ inch.

Price 1/2 Inch: 12 feet \$3.50

Price 3/4 Inch: 12 feet \$3.95

AM Foam Outlet Gaskets

Not all outlets leak air. But if one does others may too. These polyethylene foam gaskets install behind electric outlet plate covers to reduce drafts. For double or triple gang boxes multiple gaskets can be overlapped and trimmed to fit.

At \$0.10 each, buy the several dozen you need.

[Switch plate gaskets and more are available here.](#)

Price: \$0.10 each

Panasonic WhisperGreen SmartAction Fan

QuickTime™ and a
PowerPC™ are needed to see this picture.

Frank's favorite for improving indoor air quality. EXTREMELY QUIET (0.3 sones) with low energy consumption, SmartFlow™ gives continuous ventilation at a low 30 CFM level, drying the room and preventing mildew odors. The motion sensor increases the venting to high speed (80 cfm) when someone enters, with a barely audible increase in sound. The fan can be programmed to remain at high for 15 to 60 minutes after motion stops.

Price: \$209.25

P3 Kill A Watt Electricity Monitor

Find the hidden energy hogs in your home. Determine if your hobby is driving up electrical costs. Plug an electrical device into the meter and track the time and total of KWH's used. Then determine cost at the current BGE rate of 15¢ per KWH. Accurately measure the cost of leaving your computer at night, running a second refrigerator or keeping aquariums.

Price: 24.95

Aube TH141 30V Thermostat

This thermostat allows 4 temp changes per day and you can vary it each day of the week. You can set summer and winter programs that change automatically. AND it's not difficult to do. Plus it won't forget your program after a power loss. ON-OFF cycles are optimized for economy and comfort. This works for any heat or AC system except electric resistance.

Price: \$55.00

About Energy Federation Inc. (EFI)

EFI (a non-profit company) was founded in 1982 by six non-profit energy organizations, with the purposes of helping those member groups purchase quality conservation products economically and assisting the public in using energy resources efficiently. EFI has since grown to become one of the leading residential distributors of energy efficiency-related products in the United States.

Underlying EFI's mission today is the belief that a key obstacle to increased energy and water efficiency is inadequate awareness of, and access to, good quality resource conservation-related products. It is insufficient to simply recognize the benefits associated with reducing inefficient energy and water consumption - people actually need to be able to find and purchase these types of products. To learn more about EFI, visit [their website](#).
