

Contribute to HRWA and Green Your Home

The Herring Run Watershed Association is in the midst of building a new center to house their offices, plus a vibrant education center providing a variety of programs for the community. The building will be a model of green design and is expected to achieve a LEED™ Silver Rating.

On May 7th, Mayor Sheila Dixon announced the award of \$100,000 towards the Herring Run Watershed Center, and work has already started on the project.

While the Association is building the new, green Herring Run Watershed Center, why not initiate green improvements on your own home? A contribution to HRWA will help you get started.

For every donation of \$100 or more, TerraLogos Green Home Services will discount \$50 off a Home Energy PLUS Inspection and Report®, full price \$495, with discount \$445. (Or take \$35 off the price of a regular Home Energy Inspection and Report®, full price \$345, with discount \$310.)

The TerraLogos whole house approach provides homeowners with a customized, prioritized master plan for their best energy saving improvements. Together these improvements can potentially save 30% to 50% on energy costs while creating a more comfortable and healthy home. Plus, the home's impact on global warming will decrease. To learn more about TerraLogos Green Home Services, visit them on line at www.terralogos.com.

Contributions must be received by September 30th to be eligible for the TerraLogos discount gift. Discounted Home Energy Inspections must be scheduled by November 15th and be performed before December 31st of this year.
